

S-PAL Series

Palletiser

Main features

- ❖ Heavy loads and medium performance range productions
- ❖ Suitable for different environments and products
- ❖ Plug & Play
- ❖ Optimal for seasonal or discontinuous production
- ❖ Compact construction and modular design
- ❖ Economical
- ❖ Safe, simple and user-friendly operation
- ❖ Integrated remote access

Benefits

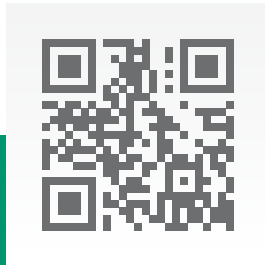

- Easily transportable
- Plug & Play for simple repositioning
- Freely selectable layer patterns
- Easily reconfigured for palletisation of different products
- Space saving due to small footprint design
- Low noise level and energy consumption
- High availability in continuous operation
- Minimum servicing requirements

Specifications

- Performance up to 360 cycles/h
- Loads up to 50 kg
- Basic unit footprint from 1900 x 1900 mm
- Pallet height up to 1600 mm
- Servo technology
- HMI touchscreen

Applications

- Stand-alone or multiple configuration options:
 - automatic infeed/outfeed conveyors
 - interlayer sheets dispenser
 - rejection conveyor
 - labelling and printing equipment
 - stainless, corrosion resistant or washdown design
- Different palletising grippers
- Customised, application-specific configurations and technical solutions
- Palletisation of a wide range of products (boxes, trays, bags, buckets, kegs, barrels, cans, jars)
